

ROBUSTA

Thanks to the heavy-duty drop arms and roller tube, Robusta is a sturdy window awning especially suitable for large windows. A stylish aluminium hood protects the fabric and roller tube from the elements.

operation is with crank and motorization is available as an option. Specially designed drop arms and slide rails convert Robusta into a balcony awning.

ROBUSTA

Window awning

Operation

External or internal operation with crank or motor. The motor can have automatic controls such as remote control or sun and wind sensors.

Installation

The awning can easily be installed directly on to the window architrave or the wall.

Drop arms

Heavy-duty drop arms with adjustable springs provide excellent fabric tension.

Components

The selection of anti-corrosion and highly durable materials allows us to offer you a comprehensive warranty. No maintenance required.
