

Arena Honeycomb Shades

The art of
energy efficiency

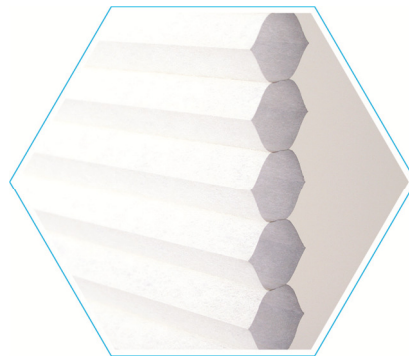

Arena Honeycomb Shades by Turnils is a sophisticated, versatile, energy-efficient window covering solution that offers insulating properties that help to control room temperature, without compromising on style.

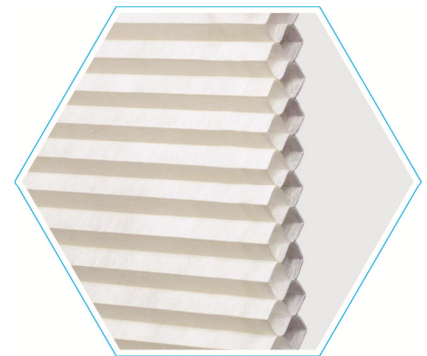

10mm Single Cell

Save up to 28%¹ on your heating costs with Arena Honeycomb Shades 10mm blackout fabrics.

20mm Single Cell

Save up to 32%¹ on your heating costs with Arena Honeycomb Shades 20mm blackout fabrics.

Double Cell

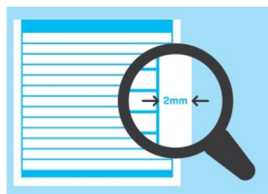

Save up to 26%¹ on your heating costs with Arena Honeycomb Shades Double Cell *Essence* translucent fabrics.

Arena Honeycomb Shades are tested and proven to help reduce the cost of heating your home. The unique structure of honeycomb fabrics means that hot air is trapped in the honeycomb cells, slowing down the transfer of heat from outside-to-in and inside-to-out. The larger or more honeycomb cells there are, the greater the level of insulation.

Arena Honeycomb Shades offer a number of distinct advantages over alternative window coverings:

Minimal light gaps

Offers light gaps as small as 2mm in recess fit, compared to 10-15mm for most roller blinds.

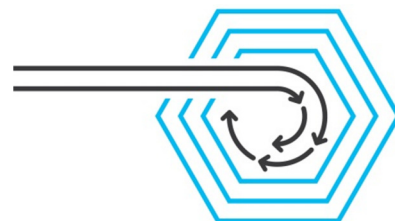

Energy efficiency

Tested and proven to help reduce the cost of heating your home.

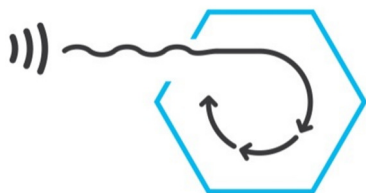

Superior insulation

Unique air pockets trap warm air and help to keep a more constant indoor temperature.

Sound absorption

Sound energy is absorbed, keeping exterior noise out and dulling interior sound.

Fire retardancy

Arena Honeycomb fabrics are tested to Building Code of Australia requirements for Fire Hazard Properties of materials in buildings². All fabrics are suitable for residential applications.

Child safety

The Arena Honeycomb Shades Cordless control system is the ideal child safety solution, with no visible cords, which helps to protect children and pets. The EasyRise system mounted with cord tensioners also offers a sound child-safe solution.

* All Turnils products that are installed correctly will comply with the Trade Practices [Consumer Product Safety Standard – Corded Internal Window Coverings] Amendment Regulations 2010 [No. 1].

Arena Honeycomb Shades offer a wide range of fabrics in a variety of styles, opacities and colours. Several different operating systems and design options are available, enabling you to tailor your Arena Honeycomb Shades to best suit your home and needs, for windows and doors or even skylights.

Easy-to-clean, 100% polyester, anti-static, dust-repellent fabrics

Choose from sheer, translucent or blackout fabrics in a range of contemporary colours, to create a customised solution that perfectly suits your requirements for light control, view-through, privacy and UV protection.

¹ Savings are based on the installation of fully-recessed, reveal mounted Turnils Arena Honeycomb Shades in an average home in Sydney, compared with the House Energy Rating Standard of Holland Blinds from AccuRate, in that home. These calculations have been modelled by an independent third party. Savings will vary based on window type and installation.

² Independently tested to AS1530.2 and AS1530.3. Please contact us to obtain a copy of the FR results for specific fabrics.
